62% of golf courses will incorporate **MORE GREENS ROLLING** in their future greens management programs.

80% of those courses are already rolling at least once a week.

The above two statistics are taken from the Golfdom Survey in Golfdom May 2012, "Putting Green Special," page S10 - S11.

TRUE-SURFACE® VIBE **V**™ VIBRATORY GREENS ROLLERS

“When the conversation about speed comes up with your golfers turn it to **TRUENESS OF ROLL** that is less stressful to achieve”

“Be True” Frankly Speaking by Frank Rossi.

... makes true greens!™

“...If you want to keep a healthy surface and get maximum performance, **YOU HAVE TO ROLL.**” For those superintendents who haven’t embraced this mowing-rolling concept Rossi encourages them to at least try some **VIBRATORY ROLLERS ON A TRIPLEX MOWER** because “there is significantly less injury associated with using that piece of equipment and it’s much faster than a speed roller.”

KEEP ROLLING!

Dr. Frank Rossi of Cornell University, who recently gave a talk entitled, “Putting Green Mowing...Less is More,” says a lot of people feared there would be a huge downside to rolling if done excessively, but he believes the only downside is created by operator error. Sorochan agrees.

On a Roll by Jason Stahl. Golf Course Industry. January 2011, p. 70-74.

“In actuality, we found that **ROLLING REDUCES DISEASES,**” he (Sorochan) says. “Tom Nikolai showed it could reduce dollar spot by 50 percent. And Bruce Clark found you could reduce anthracnose just by incorporating lightweight rolling with your mowing **THREE TIMES A WEEK.**”
