

True-Surface® Product Catalog

"I love versatility, so True-Surface® is right up our alley. We primarily use the groomers and verticutters and once in awhile the broom heads. Anyone that knows me knows that I love to renovate turf, so verticutting and grooming are critical practices at Merion. We own 7 aerators, 4 slicers, 3 seeders, but just 1 set of True-Surface® (GCC's) does all our functions."

Matt Schaffer, Superintendent
Merion Golf Club,
Host of the 2013 US Open
Ardmore, PA

True-Surface® Vibe ∇ ™ Vibratory Greens Roller

Select your vibration with the Select-A-Vibe™ Dial

1

Establishing New Greens

For gently firming newly seeded and sodded greens and bringing them into play quicker.

2

Regular Rolling

A light rolling 3 times a week (or more) will keep your greens fast and true and your members smiling!

3

Vibrating-In Light Sand Topdressing

Choose the level of vibration according to your sand types to shake the sand deep into the turf canopy.

4

True Greens After Aeration

Use extra vibration to quickly restore a smooth surface after vertidrainage or aerating your greens.

5

Tournament Preparation

Use the level 5 for optimum speed gain in tournament preparation, and watch those balls roll true.

TRUE-SURFACE® - A CUSTOM FIT

True-Surface® is the **ONLY** greens roller on the market able to customize your greens rolling practice. Equipped with the **PATENTED** Select-A-Vibe™ Dial, the True-Surface® Vibe ∇ ™ Vibratory Greens Roller allows you to adjust up to 5 levels of vibration. Choose the **EXACT** setting, **CUSTOMIZED** to fit your greens' needs.

TAKE OFF THE TRAINING WHEELS!

We realize training your employees to operate complex, sideways-driven, equipment requires a commitment of time and money. True-Surface® attaches directly to your existing greensmower - **NO TRAINING NECESSARY!**

The True-Surface® Vibe ∇ ™ is designed to fit the following triplex greensmower brands:

- Toro
- John Deere
- Jacobsen
- Ransome

All True-Surface® products are equipped with a universal design. If you decide to switch greensmower brands, a simple kit will adapt True-Surface® to your new mower, and you'll be ready to roll!

WHY DO WE USE PATENTED VIBRATION?

True-Surface® Vibratory Greens Rollers use vibration to create smooth and healthy greens. Ordinary, golf course greens rollers simply smash down the greens using weight. Vibration gives you the green speed and consistency members demand on your golf course **WITHOUT** the risk of compaction.

The use of vibration allows True-Surface® to do more than simply roll your greens for turfgrass health, speed and consistency. The True-Surface® Vibe ∇ ™ is the least disruptive method to shake-in sand topdressing, remove dew, and help eliminate sand bridging in aerification holes.

SO HOW DOES VIBRATION WORK?

Imagine putting a pile of soil or sand in the middle of a tray, and then try to spread that pile out evenly among the tray. Would you smash the pile with your hand or would you shake the tray to efficiently even out your pile? Using vibration to shake out your pile of soil or sand gives you a consistent surface.

Only True-Surface® Vibratory Rollers' patented selectable vibration utilizes rubber isolators to guide the vibration directly into your greens and away from your turf maintenance equipment. Furthermore, using the Select-A-Vibe™ feature, you can select the level of vibration you desire – choose from setting 1-5. No other roller on the market allows you to choose your energy level!

"I use my (True-Surface®) Vibratory Rollers on Tuesdays, Fridays and Sundays during the summer months and just LOVE them. We will use them even up to 5 times a week during the rainy months in the winter."

Curt Chandler, Foster Golf Links, Tukwila, WA

SMASHING YOUR GREENS SHOULDN'T BE YOUR SOLUTION!

"The efficiency of the True-Surface® Greens Roller allows us the opportunity to roll greens on days with 8:00 am shotgun starts."

Jim Knulty
Big Foot Country Club
Fontana, WI

"I have used the True-Surface® Vibratory Greens Rolling System since they were first introduced in the 90's and love the results they produce. When I came to Baywood Golf & Country Club we were in need of a new greens roller. During a recent USGA site visit, the agronomist recommended that we get a roller for the greens to help improve health of the turf and consistency of the greens. One of the member of the Baywood Women's Golf Association recommended to the Association that they have a

fundraiser for the purchase of a greens roller. The women raised the funds in a matter of months and were anxious to see the True-Surface® Vibratory Greens Rolling System in action. We have only had the units a week and already put them to work with the expected results and very satisfied golfers. With the new True-Surface® Vibe ∇™ rollers, our greens will be the talk of the town."
Gary Sayre, CGCS, Baywood Golf & Country Club, Arcata, CA

True-Surface® Greens Rollers

3 Vibratory Rollers -
85 lbs each

VS.

Self-Contained Greens Rollers

Weighted Rollers -
465 lbs - 1140 lbs

True-Surface® is the definition of LIGHTWEIGHT greens rolling!

"I use the (True-Surface®) vibratory rollers to target roll 30' from the hole after mowing and before every major tournament increasing green speed and consistency around the hole.... The rollers are extremely efficient. The rollers are equal in time to the two triplexes which mow all eighteen greens and the practice

putting greens. Along with triplex greens brush, the rollers also help to incorporate medium topdressing into aerification holes in one pass."

Tim Lohse, Sand Creek Golf Course, Idaho Falls, ID

True-Surface® Vibe V™  TRUE-SURFACE® ... makes true greens™
Attaches directly to your existing triplex greensmower.

VS.

Non-Vibratory Self-Contained Units

EASE OF OPERATION

Greensmowers are **EASY AND NATURAL** for operators of all skill levels, as they are forward facing. You can train with the True-Surface® greens rollers before sending trainees out to mow your greens. Rolls 60” per pass. True-Surface® stripes just like your greensmower.

Steering is a challenge, and some operators are much slower than others. Only extensively trained employees are allowed to operate the roller. Using a side-to-side motion can cause discomfort for the driver. Rolls 48” or less per pass on the green - no straight striping.

GREEN SPEED INCREASE

Only True-Surface can provide consistency of 2” to 4” on all greens. Side by side comparisons of True-Surface® and self-contained units resulted in **EQUAL OR BETTER** ball roll distance for True-Surface®. Using the Select-A-Vibe™ makes green speed consistency easy to achieve.

Bigger isn’t always better. A heavier/bulkier unit doesn’t produce a truer green surface. The Sport Turf Research Institute (STRI), funded by the R & A, used the True-Surface® rollers to develop their Greens Trueness Meter™.

CUSTOM ROLLING

Everyone knows that no 2 greens are alike. The Select-A-Vibe™ Dial allows you to select 1 of 5 settings, customized rolling tailored to **YOUR** greens. **Each setting increases True-Surface® energy by 20%. NO OTHER ROLLER CAN COMPARE!**

No customization available. There is one fixed weight for all your greens. The only variable is the weight of the operator. Additionally, you will always double roll the greens outer edge (collar) as a result of sideways steering.

TRACTION ON SLOPES

No problems! Greensmowers are made for greens! With the ability to raise the rollers with each turn, collar damage is **NEVER** an issue.

Spin out is a problem and damages the turf. Collar damage is a major concern as noted by academia studies.

EASE OF TRANSPORT

Triplex greensmowers are driven from green to green. The operator **NEVER** has to get out of the seat, saving time and money in a budget crunched economy.

Most need a trailer AND a utility vehicle to move from green to green. The operator has to get off and on at least **72 TIMES** while rolling 18 greens - not a practical use of labor.

OPERATOR SAFETY

Triplex greensmowers are not considered unsafe, and True-Surface® will not affect your ball roll or leave a crease in your greens.

SAFETY is definitely a concern - as reported by users. Additionally, heavy self-contained units leave creases on your greens that your affect ball roll.

SUPER QUOTE FROM MERION GOLF CLUB

“ I love versatility, so True-Surface® is right up our alley. We primarily use the groomers and verticutters and once in awhile the broom heads. Anyone that knows me knows that I love to renovate turf, so verticutting and grooming are critical practices at Merion. We own 7 aerators, 4 slicers, 3 seeders, but just 1 set of True-Surface® does all our functions. ”

Matt Schaffer, Superintendent
Merion Golf Club, Ardmore, PA - Host of the 2013 US Open

True-Surface® Greens Care Collection

The True-Surface® Greens Care Collection (GCC) is designed to make your greens care program easier on you and your budget. The True-Surface® vacuum effect will clean-up your greens with no additional labor, saving you time and money, making your greens ready for play as soon as you drive off!

1 FRAME - 13 GREENS CARE TOOLS

Don't waste money buying a bunch of expensive equipment to perform the same tasks that the Greens Care Collection does itself. 1 SET OF FRAMES TO PERFORM 13 CULTURAL PRACTICES.

The GCC consists of 3 frames that attach directly to your existing triplex greensmower. Each frame has the ability to switch out from 13 different inserts. Each insert represents a different greens maintenance tool – making the GCC an ALL-INCLUSIVE product.

FAST & EASY GREENS CARE

The True-Surface® Greens Care Collection (GCC) has 13 different insert options. Each insert can be switched out by releasing 2 retractable spring plungers - NO TOOLS NEEDED. The hydraulic motor always remains attached to the GCC frame. The interchangeable inserts can be switched out while still on the golf course; NO TOOLS NOR TECHNICIANS ARE NECESSARY!

The GCC is designed to fit all triplex greensmowers while making your greens care cultural practices FAST & EASY. Since 1992, True-Surface® products have been designed with NO PLANNED OBSOLESCENCE. You can rest assured knowing that your Greens Care Collection has been designed to last a lifetime!

EASY-TO-USE DEPTH GAUGE

True-Surface® makes adjusting your depth of cut even easier with the revolutionary Depth of Cut Sight Gauge. Using the gauge GUARANTEES a precise setting and an even cut every time!

You will feel and hear the clicks as you turn the knob. Each click equals .010" or .25mm. Verify your adjustment by using the site gauge for a precise cut!

US Patent 7,624,560

Patented Adjustable Hood
US Patent 8,316,628

FEATURES DESIGNED FOR YOU

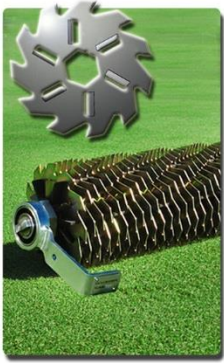

The True-Surface® Greens Care Collection will SURPASS your expectations with its many features.

Sturdy Frame Design – Unlike other interchangeable systems, True-Surface® is not compromised by a flimsy clam-shell design. The Greens Care Collection frame is designed to withstand golf course conditions such as weather, shop floors, and chemicals.

Easy-to-use Depth of Cut Site Gauge – No more counting “clicks” and turns, the patented True-Surface® Depth of Cut Adjuster has a Site Gauge that allows you to quickly adjust your settings by simply choosing your mark.

Time Saver – Change out your inserts without removing the Greens Care Collection from your greensmower.

Interchangeable Inserts – The True-Surface® Greens Care Collection will do what would normally take multiple types of equipment to perform. Stop buying expensive equipment - just start your collection of greens care inserts!

VACU-CUTTER™ 45 BLADES

Usual Working Depth: 0 - $\frac{1}{8}$ " (0 - 3 mm)

Maximum Working Depth: $\frac{1}{4}$ " (6 mm)

Blade Spacing: $\frac{3}{8}$ " (10 mm)

Blade Type: Each insert has 45 stainless steel blades with 11 tungsten carbide tips on each.

Purpose: The Vacu-Cutter™ Insert will remove and vacuum up 20 times more material than standard OEM verticutters. Its vacuum-power system shoots the material directly into the grass basket without additional clean-up.

VACU-CUTTER™ 32 BLADES

Usual Working Depth: 0 - $\frac{1}{8}$ " (0 - 3 mm)

Maximum Working Depth: $\frac{1}{4}$ " (6 mm)

Blade Spacing: $\frac{3}{5}$ " (15mm)

Blade Type: Each insert has 32 stainless steel blades with 11 tungsten carbide tips on each.

Purpose: The Vacu-Cutter™ 32 Blade Insert is designed to give you more options. With more spacing between each blade, it provides a less aggressive option for verticutting.

VACU-GROOMER™

Usual Working Depth: 0 - $\frac{3}{32}$ " (0 - 2 mm)

Maximum Working Depth: $\frac{3}{32}$ " (2 mm)

Blade Spacings: $\frac{3}{8}$ " (10 mm)

Blade Type: Each insert has 45 stainless steel blades with 2 tungsten carbide tips on each. Blade tips are offset so they can cut at $\frac{1}{4}$ " (5 mm).

Purpose: Use the Vacu-Groomer™ Insert to stand your grass up prior to mowing to provide a nice even cut. Additionally, this insert is an effective tool to remove Poa Annuua seedheads.

VACU-SCARIFIER™

Usual Working Depth: $\frac{5}{16}$ - $\frac{3}{8}$ " (8 - 10 mm)

Maximum Working Depth: $\frac{3}{8}$ " (10 mm)

Blade Spacing: 1 $\frac{1}{2}$ " (40 mm)

Blade Type: Each insert has 12 stainless steel blades with 5 tungsten carbide tips on each.

Purpose: Use the Vacu-Scarifier™ as a supplement to regular use of the Vacu-Cutter™ Insert. It removes large amounts of thatch and opens the surface for entry of air, sand top-dressing, water, and chemicals.

GREENS SPIKER

Usual Working Depth: $\frac{3}{4}$ " (20 mm)

Maximum Working Depth: $\frac{1}{2}$ -1" (13-25 mm)

if ground conditions are soft enough

Spike Spacing: 2 $\frac{3}{8}$ " (60 mm) giving 344 holes per square yard (400 holes per square meter)

Spike Type: 55 hardened steel spikes 1 $\frac{1}{4}$ " long

Purpose: The Greens Spiker will penetrate through your green's surface to allow air and water entry. You are able to prep your greens for overseeding with 2 or 3 passes. The Spiker is also a great tool for venting during high humidity months.

STAR SLITTER

Usual Working Depth: $\frac{1}{2}$ - $\frac{3}{4}$ " (13 - 20 mm)

Maximum Working Depth: $\frac{3}{4}$ " (20 mm)

Blade Spacing: 1 $\frac{1}{2}$ " (40 mm)

Blade Type: Each insert has 11 7-point spring steel blades.

Purpose: Use the Star Slitter Insert for a fast and easy way to aerate the surface of the green without disrupting it. It will leave the surface smooth and ready for play.

DEEP SLICER

Usual Working Depth: $\frac{3}{4}$ " (20 mm)

Maximum Working Depth: $\frac{3}{4}$ " (20 mm)

Blade Spacing: 1 $\frac{1}{2}$ " (40 mm)

Blade Type: 12 round cornered triangular blades, .03" (.7 mm) thick

Purpose: Use this insert to create deep continuous slits in the green to allow gas exchange, water penetration and stimulate root growth. The blades are designed to remove no material, and leave the surface immediately ready for play.

VACU-BRUSH™ Firm, Soft & Super Soft

Usual Working Depth: 0

Bristles should just lightly skim the top of the turf.

Bristle Types: Firm, Soft & Super Soft Bristles

Purpose: There are three types of brushes for different uses. Use the soft and super soft brushes to remove dew, surface debris, and worm castings. Use the firm brush to groom the turf, collect large debris, and remove Poa Annuua seeds along with excess topdressing. Remove your grass basket and use the brush to work topdressing into the canopy.

NV ROLLER NON-VIBRATORY

Roller Type: Non-Vibratory greens roller; made of 5" (127 mm) diameter with 1" (25 mm) wall steel tube; 3" (76 mm) diameter removable weight bar.

Weight: Each individual roller weighs 74 lbs (34 kg), with a 38 lbs (17 kg) removable weight bar. Additionally, the frame adds 46 lbs (21 kg). A total possible weight of 158 lbs (72 kg).

Purpose: Use the True-Surface® NV Roller Insert to gain green speed, and smooth greens. Rolling will also allow you to raise your height of cut.

VERTICAL MOWER

Usual Working Depth: 0 - $\frac{1}{8}$ " (0 - 3 mm)

Maximum Working Depth: $\frac{1}{4}$ " (6 mm)

23-Blade Spacing: $\frac{1}{2}$ " (13 mm)

44-Blade Spacing: $\frac{3}{8}$ " (10 mm)

Blade Type: 11-tip vertical cutting blade. Each Insert is built with your choice of either 23 or 44 non-carbide tip blades.

Purpose: The Vertical Mower Insert will thin out horizontal growth by cutting perpendicular to the soil surface.

NEW

TOPDRESSING & GROOMING

Introducing the True-Surface® Flex Brush! This topdressing and grooming brush is designed to efficiently incorporate light sand topdressing AND neatly groom your greens. Quickly attach the Flex Brush to your triplex greensmower and use it in conjunction with your True-Surface® Greens Care Collection, your True-Surface® Vibe ∇ ™, or even your triplex cutting reels! It's extremely versatile!

CHOOSE YOUR BRUSH

You want options - we have options! Choose how you want to brush according to your conditions. With 5 brush slots and 4 different types of removable brushes, you can customize your brush to fit your exact needs. Choose your perfect combination:

- ✓ Soft Solid Brush
- ✓ Firm Solid Brush
- ✓ Soft Slotted Brush
- ✓ Firm Slotted Brush

KEEP YOUR OPTIONS OPEN

With 4 free floating settings and 1 fixed setting, the True-Surface® Flex Brush offers 5 options to adjust the pressure applied. Allow the Flex Brush to free float and easily contour to the greens. Choose from 4 free float settings to apply variable pressure:

- 10 lbs (2.7 kg)
- 15 lbs (4.5 kg)
- 18 lbs (6.4 kg)
- 25 lbs (8.2 kg)

If free floating isn't for you, simply lock your brush to the fixed position. FIVE OPTIONS! YOUR CHOICE!

SELF-LEVELING DESIGN

CUSTOM BRUSH OPTIONS

ADJUSTABLE HEIGHT/PRESSURE

Our Flex brushes are completely reversible! When your brushes start to wear, simply reverse them and keep brushing! It's that easy! You will DOUBLE the life of your True-Surface® Flex Brush!

VIBRATE-IN TOPDRESSING WITH TRUE-SURFACE®

University research has proven that the True-Surface® patented, adjustable vibration will vibrate 45% MORE TOPDRESSING into the turfgrass canopy than just brooming alone. By incorporating more topdressing into the canopy, you have less organic matter build-up in the putting surface. Less organic matter results in GREATER GREEN SPEED!

Use the True-Surface® Flex Brush in conjunction with the True-Surface® Vibratory Greens Rollers for the easiest, MOST EFFECTIVE method of topdressing incorporation!

True-Surface® Trekker™

For the times you don't want to put a riding greens mower on your greens, we have created the True-Surface® Trekker™. The Trekker™ takes our original True-Surface® units and attaches it to your walk behind greensmower. It allows you to complete multiple cultural practices by simply using the walk behind greensmower you already own. The Trekker™ fits your Toro Flex 21, Toro Flex 2100 Jacobsen Eclipse, and John Deere 220E-Cut.

The True-Surface® Trekker™ product line is made up of 2 different attachments. The first is the True-Surface® Trekker™ Vibe ∇™ Vibratory Greens Roller. It uses the patented True-Surface® adjustable vibration to create smooth, healthy, and consistent greens. Not only will the Trekker™ Vibe ∇™ easily roll your greens, but it will also vibrate-in your sand topdressing.

The second Trekker™ product is the True-Surface® Trekker™ Greens Care Collection. This collection allows you to transform your walk behind greens mower into a cultural practice machine that will perform up to 13 different cultural practices. The True-Surface® Trekker™ Greens Care Collection is equipped with 13 interchangeable inserts, allowing you to switch cultural practices with ease. It's FAST & EASY!

True-Surface® Trekker™ Vibe ∇™

The True-Surface® Trekker™ Vibe ∇™ offers the same proven benefits as the triplex driven True-Surface® Vibratory Greens Roller, but now you can attach it to your walk behind! The Trekker Vibe ∇™ is equipped with the patented Select-A-Vibe™ adjustable vibration. Select vibration levels 1-5 to fit your exact cultural practice needs.

University studies prove that rolling your greens will improve turfgrass health, help increase consistency, and gain green speed. However, with the True-Surface® patented vibration, the True-Surface® Trekker Vibe ∇™ does more than simply roll your greens for health, speed and consistency. The Vibe ∇™ is the least disruptive method to shake-in sand top-dressing, remove morning dew, smooth greens after core aerification, and help eliminate sand bridging in aerification holes. True-Surface® is the ONLY greens roller to offer you so many options!

Rolling 3 Times per Week Will:

- Increase turfgrass health and provide greater root density, which provides better greens and more satisfied customers.
- Increase greens speed. Raise your height of cut, improve turfgrass health, and increase golfers' satisfaction.
- Improve turfgrass health by decreasing dollar spot and localized dry spot.
- Save your course up to \$14,000 annually using a walk behind, up to \$5,000 annually using a triplex.
 - ★ Save on chemical AND labor costs
 - ★ Create course revenue

True-Surface® Trekker™ Greens Care Collection

With 13 different interchangeable inserts, the True-Surface® Trekker™ Greens Care Collection (GCC) is one of the most versatile products on the market. The Trekker™ GCC is easy on you and your budget. Switch from 13 different Inserts without purchasing a whole new machine. Purchase your initial frame, and keep adding new inserts. To achieve optimal results, **COLLECT ALL 13!**

Each True-Surface® Trekker™ GCC is equipped with a patented depth of cut adjuster. There is no need for setting bars or tools; simply click your inserts into position. You will feel and hear each .010" click! Each adjuster is also equipped with an easy-to-read sight gauge. The insert positions marked on the gauge guarantee a precise setting and even cut every time!

Collect all 13 inserts, to experience how easy it is to switch cultural practices **WITH ONLY 1 SET OF FRAMES!**

True-Surface® NV 3 x 3™ Non-Vibratory Greens Roller

EXPERIENCE THE BENEFITS OF THE NV 3X3™:

Tri-Rolling System - 3 rollers for a smooth surface

Adjustable Weights - Each roller weighs 140 lbs (63.5 kg) with four 5 lb (2.3 kg) weight options per roller

Maintenance Free - No grease maintenance required

Universal Design - Allows you to switch mower brands with a simple fitting kit

The True-Surface® NV 3x3™ is a non-vibratory greens roller that uses an innovative tri-rolling system to smooth the greens. Its universal design allows you to attach the greens roller to any Toro, John Deere, Jacobsen, G-Plex, and Ransome triplex units. Your greens will be the envy of others when you use the True-Surface® NV 3x3™!

SPECIFICATIONS:

Each roller weighs 140 lbs (63.5 kg) with four 5 lb (2.3kg) weight options per roller

2 Sealed, maintenance-free ball bearings per roller

60" (152.4cm) roller working width

3 solid steel rollers - measures 2.38" (6cm) diameter each

Triplex hydraulic motor attaches directly to the roller for added weight and for motor security

Steel frame that is .25" (6.35mm) thick

- ◆ **TRANSPORT IRREGULAR-
SHAPED OBJECTS**

The BadgerClaw is unlike any other grapple you've ever seen! It features a 3-point system that allows a range of 180 degree mobility. You can perform more tasks than ever imaginable! With dual-independent claws that are self-leveling, the BadgerClaw gives you the flexibility to SAFELY control various diameter targets. Transport various materials with ease!

Completely remove trees (including the root wad) in mere SECONDS! Shake off any excess soil, tightly stack your burn pile, then backfill your tree hole with the grader blades.

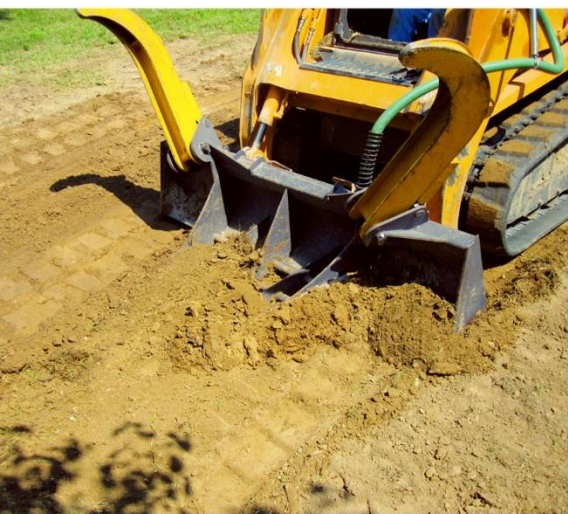

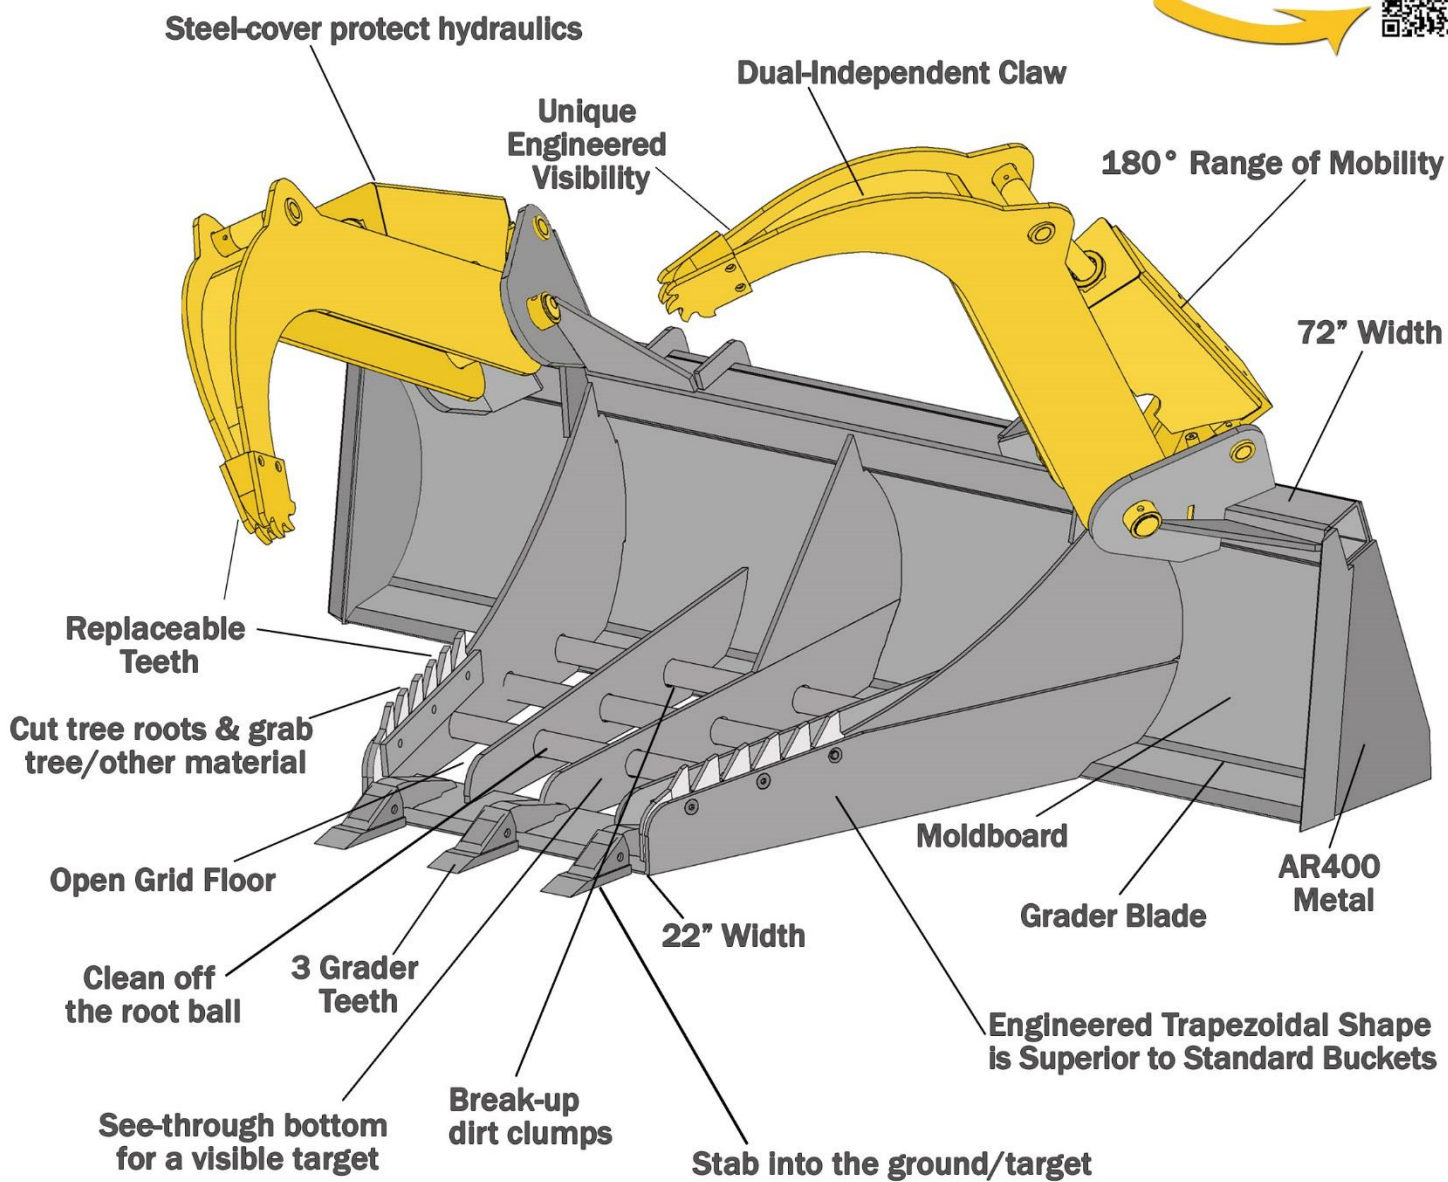

THE VERSATILITY WILL AMAZE YOU!

The True-Surface® Promise

As the manufacturer of all True-Surface® Products, Turflite, Inc. promises to provide quality products along with quality service. No matter which True-Surface® product line you decide to purchase, there is no planned obsolescence. Even if you switch brands of greens mowers, there is always a kit that will adapt your product to fit the new mower. Additionally, we carry parts to fit even our oldest generation products. Even if you've owned your True-Surface® product for over 20 years, we can provide the parts you need!

Turflite, Inc. staff are real people who provide real service! When you call Turflite, Inc. during regular business hours, your call will always be answered by a person and NEVER an answering machine! Our sales force is well trained in all True-Surface® product features and technicalities and will make it a top priority to assist you with the True-Surface® Product Line.

Contact a Turflite, Inc. representative to experience your True-Surface® demo today!
