

True-Surface®

Celebrating 20 Years of Rolling Expertise

“Fifteen years ago, golf course superintendents were much more apprehensive about rolling their course’s greens than they are now... Research changed that apprehension. Now superintendents are rolling greens more than ever.” ~ Golfdom, April 2010

Greens rolling isn’t a new concept for us; we’ve been perfecting it for 20 years now!

“Research conducted at several universities, including Michigan State, Rutgers and Tennessee, have shown that mowing three to four times per week and rolling daily can leave putting surfaces less susceptible to diseases such as dollar spot and anthracnose.” ~ Turfnet Almost Monthly, July/August 2010

University research proves using your greens roller daily will improve turfgrass health!

“I don’t know if there is such a thing as rolling too much. I would recommend rolling, and rolling often; even multiple times per day. People think it’s crazy, but the data doesn’t lie.” ~ Paul Giordano, graduate student at Michigan State Turfnet Almost Monthly, July/August 2010

Vibratory Roll Your Greens!

The True-Surface® Vibe V™ and the True-Surface® Trekker™ Vibe V™ are both equipped with the patented Select-A-Vibe™ dial. Select the amount of vibration by a simple click of a dial.

US patent #'s 7,624,560 & 5,261,213

Patented Vibratory Action

Keep your greens healthy and smooth with the True-Surface® Vibe ∇ ™ Vibratory Greens Rollers! The patented Vibe ∇ ™ consists of 3 vibrating greens rollers custom-designed to fit Toro, Jacobsen, John Deere, and Ransome Triplex greens mowers. With the introduction of the True-Surface® Trekker™, these vibratory greens rollers will also attach to your Toro Flex 21 and will soon fit your Jacobsen Eclipse or John Deere 220E-Cut walk behind greens mower!

The use of vibration allows True-Surface® to do more than simply roll your greens for turfgrass health, speed and consistency. The True-Surface® Vibe ∇ ™ is the least disruptive method to shake-in sand topdressing, remove dew, and help eliminate sand bridging in aerification holes.

Patented Select-A-Vibe™ Dial

A unique feature to the True-Surface® Vibratory Greens Rollers is the Select-A-Vibe™ Dial. The dial allows you to select the amount of vibration you want to put into your greens -giving you complete control! With the ability to increase the vibration with 5 clicks, you can adjust your greens' condition to fit your exact needs with an energy increase of 20% per click!

Select your vibration with the Select-A-Vibe™ Dial

1

**Establishing
New Greens**

For gently firming newly seeded and sodded greens and bringing them into play quicker.

2

**Regular
Rolling**

A light rolling 3 times a week (or more) will keep your greens fast and true and your members smiling!

3

**Vibrating-In
Topdressing**

Choose the level of vibration according to your sand types to shake the sand deep into the turf canopy.

4

**True Greens
After Aeration**

Use extra vibration to quickly restore a smooth surface after vertidrainage or aerating your greens.

5

**Tournament
Preparation**

Use the level 5 for optimum speed gain in tournament preparation, and watch those balls roll true.
